OKIFAX *5780*

OKIFAX

OKIFAX *5780*

TECHNICAL FEATURES

Ease Of Use

- Speed dials - 40 one-touch and 150 speed dials
- Group dials - 20 groups (up to 190 addresses per group)
- User-friendly 4-line LCD (4 x 20 characters)
- Direction keys
- Help key for a quick menu print-out
- QWERTY-type keyboard
- Auto redial
- Auto reduction

Paper Handling

- Output - paper tray 250-sheet standard, 500-sheet optional
- Input - 50-sheet ADF
- Document size A4
- Face up stacking - 10 sheets for transparency printing

Image Quality

- Oki 10ppm true 600dpi Digital LED engine (quality, reliability and speed)
- Oki Smoothing Technology - for resolution enhancement
- 300 x 300dpi fax transmission (600dpi transmission with 8MB memory option)
- Half-tones - 64 grey scales
- 600dpi-class copy/scan capability (with 8MB memory option)

Low Running Costs

- 33.6K model with MMR coding
  - 3 sec/page transmission speed (ultra high-speed, low-cost faxing)
  - 1.5 sec/page transmission at 200 x 100dpi (with ISDN option)
- Delayed send, broadcast and batch send (send faxes at cheap rate times and eliminate the need to dial the number several times)
- Low cost-per-copy
- Extended toner life - 5,000 A4 pages (at 4% coverage)
- Extended drum life - 20,000 A4 pages (continuous printing)
  - 14,000 A4 pages (3 pages per job)
- Ultra-low power consumption - <0.5W at standby mode
- Remote diagnostics
- Toner save mode

Environmentally Friendly

- Virtually zero ozone emission
- Separate toner drum - less waste
- Power save mode - <0.5W at standby
- No fan noise when idling
- All major parts marked for recycling

Advanced Fax Features

- Dual access - scan documents into memory while machine is receiving
- Instant dialling - send fax while scanning
- Standard memory - 2.5MB (approx. 200 pages)
- Optional 2MB/4MB/8MB upgrades for total 360/520/840 pages
- Memory back-up - data in the memory secured even with power failure for up to 200 hours
- Quick scanning - 3 secs per page
- Priority send - to prioritise sessions or jobs
- Broadcast/delay broadcast - up to 210 locations
- Relay broadcast initiate - can request another machine to perform a relay broadcast
- Delayed send - 20 transmissions over 3 days
- Memory reception mode - receive all messages into memory
- 16 confidential mailboxes - ITU SUB address
- Bulletin polling with 16 mailboxes - ITU Selective Polling
- Restrict access - limits use to authorised personnel with ID
- Batch transmission
- Back-up file function - automatic copying to an assigned address

Speed, Power, Specification

- Compatibility - Group 3, Group 4 option
- 33.6K modem 3 secs/page transmission
- Coding scheme - MH/MR/MMR
- Telephone - PSTN/PBX (direct line/switchboard/ISDN option)
- Power - AC 198-264V (nominal 230V) 50/60Hz
- Dimensions - 360 x 472 x 352mm (W/D/H)
- Weight - 14kg
- Substantial options:
  - ISDN/Group 4 fax (with G4-G3 and G4-G4 Multi Link, allowing dual mode communication)
  - Network connectivity (printer, fax gateway, scanner, store and forward e-mail fax , including PDF support)
  - Real-Time Internet fax
  - Dual line (G3) doubles the capacity by allowing simultaneous send/receive of faxes
  - Multi-interface kit for upgrade to true MFP
  - Second paper cassette
  - Telephone handset

OKIFAX *5780*

Digital LED Plain Paper Fax

Setting new standards in connectivity, capability and value

OKIFAX *5780*

In large departments and corporate fax environments, the changing demands in fax communications are placing ever higher expectations from the features and performance of your fax machine. With the OKIFAX *5780*, you'll discover that rare combination of superb functionality, proven reliability and excellent print quality — with a host of options that bring even more flexibility to your workflow as your requirements change.

With its forward-thinking modular design, the **OKIFAX** *5780* brings new levels of versatility and productivity to your fax communications. Immediately, you'll enjoy the advantages of high-speed transmission and printing — and rapid scanning at just three seconds per page.

As your needs change you can introduce network connectivity for shared printing and scanning. Store, forward and receive faxes via the Internet. Reduce transmission costs further with ISDN. Add the second line option for simultaneous transmission and reception of faxes. Features and functionality with ease of use — and totally cost-effective.

Image — the essential quality

The **OKIFAX** *5780* incorporates Oki's own Digital LED technologies to deliver benchmark print quality and reliability — with low operating costs. Adding value to your documents adds value to your business. And if you choose the network printer, multi-interface options or 8MB memory option for high resolution fax communication and copies, you gain true 600dpi to bring out a superior definition of images and text.

More cost-effective communications

With Super G3 transmission as standard and optional ISDN connectivity, the **OKIFAX** *5780* is designed to minimise your call charges by reducing communication time. Its 33.6Kbps modem offers Super G3 transmission — which means you can transmit a typical A4 document in around three seconds.

Include the ISDN G4 option and you can reduce transmission time for many documents to just 1.5 seconds (with 200dpi x 100dpi resolution). Combined with fast connection to destination addresses, this opens the way for significant improvements in overall transmission speeds and cost saving.

No compromise in speed or print quality
The application of our Digital LED technology means the **OKIFAX** *5780* prints at up to 10 pages per minute — and has the capability to print documents at true 600dpi resolution.

Super-fast scanning

At just three seconds per page, there's a real 'walk-up and scan' benefit with the **OKIFAX** *5780*. There'll be less — if no — queues and improved productivity by reducing time spent scanning. The super-fast scan speed also allows rapid scanning, even if the machine is busy, for copying or storing multi-page documents for subsequent transmission.

Ease of Use

User-friendly operation
The **OKIFAX** *5780* is designed to be intuitive, interactive and user-friendly, so it incorporates an informative display, navigation key and QWERTY keypad. This push-button simplicity means all users can learn easily and quickly how to operate and benefit from the **OKIFAX** *5780*'s many time-saving features.

Advanced dialling
Advanced dialling functions offer new levels of efficiency — that save time dialling and helping to eliminate wrong numbers. With the **OKIFAX** *5780* you can set up one-touch dialling of up to 40 frequently-used numbers, and allocate up to 150 numbers for speed dialling. You can also create up to 20 groups from these numbers for easy distribution (ideal for communicating with suppliers or customer types, for example). A priority key is also available — enabling you to send faxes to certain numbers in advance of others.

Powerful memory and back-up
The **OKIFAX** *5780*'s standard memory (2.5MB) holds around 200 A4 pages — so you can store multiple outgoing faxes for transmission later or for broadcasting. Large incoming documents can also be held in memory if paper or consumables run out, and there's up to 200 hours of battery back-up to safeguard your work during power failures.

For more heavy duty requirements, you can upgrade with 2MB, 4MB or 8MB memory options to store up to 360, 520, or 840 A4 pages. This way, memory-intensive documents can be handled more economically by taking advantage of off-peak tariffs.

Excellent paper handling

Peak loads are handled with ease by the **OKIFAX** *5780*'s paper-handling capabilities. With a 250-page paper capacity as standard, a 500-page optional second tray and a 50-sheet automated document feeder, it can work through longer faxes automatically and in less time. Printing transparencies is simple too: up to 10 at a time can be stacked face up and fed through the straight paper path.

Multi-functionality

Network kit upgradability
To meet the challenge of changing business needs, your **OKIFAX** *5780* can be upgraded to a network multi-function device supporting major network protocols like TCP/IP and NetBEUI. With an **OKIFAX** Network Kit option providing advanced e-mail features and an Email key, the machine can become a network printer, store and forward Internet fax (fax to e-mail), network fax (fax gateway) and network scanner.

Real-Time Internet kit
Excellent connectivity options enable you to send and receive faxes easily via the Internet and receive message confirmation.

Multi-Function upgradability
Oki's Multi-Interface Kit option can upgrade your **OKIFAX** *5780* to a full Multi-Function Peripheral to offer true 600dpi Digital LED printing, PC scanner and PC fax functions, as well as intuitive document management through **Unimessage** *Pro* software.

Environmentally friendly

Environmental factors are a high priority for Oki's designers. The **OKIFAX** *5780* draws just 0.5W of power in power save mode, and uses separate consumables to help prevent waste. And like all Oki printers and fax machines, its operation is virtually ozone-free.

Major Applications

The **OKIFAX** *5780* is a high-specification Digital LED plain paper fax machine designed for heavy-duty operations in a large department or workgroup.

Handling complex graphics and visuals with ease, the **OKIFAX** *5780* processes documents quickly and effortlessly, transmitting and scanning at just 3 seconds a page. And with its fast handling and large memory, it's soon available for the next job.

The **OKIFAX** *5780* means convenience and capability. It offers power, reliability and the wide connectivity options that provide highly productive links with the company's LAN or the Internet — making it quick, easy and economical to send faxes anywhere in the world. It's also excellent value for money, with low running costs and a wealth of advanced features.

OKIFAX *5780* highlights

- High-speed 3 second transmission (1.5 second with G4 option)
- High speed 10ppm print engine
- 600dpi resolution, input and output, and fax communication (with 8MB option)
- Network and Internet connectivity options
- Expandable to a printer and scanner with true multi-functionality
- Ease of use via large display, navigation key and QWERTY keypad
- Real-Time faxing over IP (option)
